

App user Manual

Author: Afnan Rafique

Acknowledgements

First of all before starting this manual I would like to thank: Mrs Mani Mahotra, Mrs Kangana, Mrs Smita and Mr Ken for helping me in my internship journey. With that out of the way let's begin!

Introduction to Myself

Hello! My name is Afnan Muhammad Rafique, I am 13 years old and I have loved coding since the start of 2020. My favourite things to do are:

1. Experiment with game genre in Scratch
2. Do practice of my school and coding classes.
3. Playing badminton at school.

My Internship experience with Clevered

I joined this Internship in late August 2022 and it was a lifetime opportunity for me, the internship allowed to meet coding experts from Oxford University. There were more kids in this internship that I'm usually used to, but that doesn't bother me. In fact, a friend that I made in Saudi Arabia is doing the same classes I'm doing, so that made me glad. Overall, I had a very great experience during this internship.

Badges earned so far

So far I've earned mostly rockstar badges for:

- 1.Attentiveness
- 2.Good behavior.

My App

My app is a Password Storage App. As the name suggests, the app is used to store passwords of different websites, emails or the password of your computer.

Options in app

There are only two options

1.If respond that you are “trying to sign in” , then it will show you the way to sign in the website with a new account that is stored into the computer.

If you respond that you are “logging in” , then it will show you the to log in to your original account that was previously stored in the computer.

Contacts

You can ask me anything by my Gmail,
